

ON THE ROAD AGAIN...

ROXY, SUIGGIE, SQUEAK & VALENTINO (named for his rescue on Valentines Day) were successfully rescued through HARTs network of trusted resources, on Wednesday past.

All 4 kitties were vet checked/vaccinated/dewormed/deflea-ed and spay/neutered before their lengthy transport to rescue resources. All are fostered by a reputable rescuer in southern Ontario, all soon ready for adoption to responsible, caring families of their very own.

Calling her hairy drive to safekeeping, The Furry Feline Express Cat Transport, "NFECT," HART volunteer Gail said, all kits slept soundly for the entire long drive, happy to stretch their tails upon arrival.

This feline transport was just one of many undertaken by HART over many months. A profound overpopulation of cats in this region and in fact provincially, overwhelms all rescuers hoping to find suitable adoptive placements for abandoned, stray and injured cats.

Since 1995 HART has faithfully served its mission statement to provide supportive care for stray, injured and abandoned animals in a catchment area of 13 municipalities.

Local feline populations are served by HARTs Spay/Neuter Incentive Program, "SNIP," initiated in 2005. Hundreds of orphaned felines have found their new families with the support of this worthy program, one of a few of its kind in Ontario...meeting the needs of many cats and dogs, at an average annual rate of 150 animals/\$10,000., per each of 5 years. Trap/Neuter/Release, TNR - feline caretaker colonies have also benefitted from SNIP support. Injured animals continue to be provided emergency vet care by HART.
